Project Overview

We designed a Home Visit Scheduling Application to improve efficiency and coordination within a Case Management Department.

- ❑ Increased Productivity
- ❑ Enhance patient engagement
- ❑ Decrease unnecessary travel
- ❑ Keep patients assessments on track
- ❑ Improve documentation rates

Project Details

Features

- Name Validation
- Date of Birth Validation
- Case Manager Selection
- Appointment Time Selection
- Appointment Confirmation
- Automated Confirmation Messages

Tools Used

- Python
- GitHub
- Process Flow Diagram
